

Topic 6: Multiplying & Dividing Integers - Block 3 Homework

The product or quotient of **two positives** is always **positive**.
The product or quotient of **two negatives** is always **positive**.
The product or quotient of **one negative** and **one positive** is always **negative**.

Apply the rules. Calculator use is not allowed!

1) $6 \cdot (-4)$

2) $4 \div 2$

3) $-3 \cdot 5$

4) $-24 \div 12$

5) $5 \cdot (-5)$

6) $-12 \div (-3)$

7) $-5 \cdot (-6)$

8) $-22 \div (-2)$

9) $-8 \cdot 2$

10) $-88 \div 11$

11) $-7 \cdot (-5)$

12) $-54 \div (-9)$

13) $-12 \cdot 6$

14) $-52 \div (-4)$

15) $-8 \cdot (-12)$

16) $-18 \div (-3)$

17) $-13 \cdot 5$

18) $120 \div (-3)$

19) $15 \cdot (-6)$

20) $0 \div (-3)$

21) $-10 \cdot 5 \cdot (-2)$

22) $-12 \cdot 4 \div (-24)$

23) $-20 \cdot 4 \cdot 8$

24) $35 \cdot (-5) \div (-25)$
